

```
SQL> create table bowie as select rownum id, sysdate-mod(rownum,500) start_date,
'BOWIE' text from dual connect by level <= 1000000;
```

Table created.

```
SQL> alter table bowie add constraint bowie_idx primary key (id);
```

Table altered.

```
SQL> exec dbms_stats.gather_table_stats(ownname=>null, tabname=>'BOWIE',
cascade=>true, estimate_percent=>null, method_opt=>'FOR ALL COLUMNS SIZE 1');
```

PL/SQL procedure successfully completed.

```
SQL> set autotrace traceonly
```

```
SQL> select id from bowie;
```

1000000 rows selected.
